frater tuus, in quo quantum populorum amor, ac ſtudium in Principem ; quantum huius in illos beneuolentia, & cura certatim poſſint, nos admiramur quidem præſentes, poſteri inter exempla optimorum Principum reponent. Equidem hoc ego loco ad Ferdinandum parentem tuum prouocarem, cuius in regendo prudentiam ſuſpexit hæc ætas, deſpicere potentiam hoſtes non potuerunt : Quoties adornatis mari triremibus feralis Turcarum Luna, Mediceorum oppoſitu orbium defectum pati viſa eſt. Facerem hoc inquam, non ingratus, niſi iam ex iſto Purpuratæ maieſtatis faſtigio conferres Te ad Mediceos Cardinales plurimos, Mediceosq. Pontifices omnino quatuor. Quamquam non in vltima familia Veſtræ parte collocandum eſt : quod ſe ſe quoque Gallia Mediceis addiderit orbibus, ſuaq. his lilia melioris ope fortunæ conſeuerit, quæ poſtea vtraque Galliarum Regina CATHERINA, & MARIA ſuis abunde virtutibus aluerunt. Deberent hæc quidem omnia Paulum Iouium præconem habere, dignum olim habitum, qui tergeminos Mediceos orbes acciperet: Sed in huius deſiderio debui ego non tam præco, quàm admirator illi ſuccedere, cui ſi conſanguinitate coniunctus ſum, ab eodem in hac laudatione perſoluenda diſiungi non poteram. Atque hoc trimulæ huiuſce meæ Philoſophiæ Te cum hoc poſitionum manipulo adeuntis, Mediceæ gloriæ vectigal eſto. Vale.

ANTE CONCERTATIONES PHYLOSOPHICAS PRAELVSIO AD CARDINALES

Nouas tyderum phoenomena (Princ Illustr) dentitate, & rarita te gemi= na quali interprete explicantur: Cur id ego non faciam, cum non antiqua solum phoenomena, sed ea etiam, quæ nostra hæc ætas (qua nulla perspicacior) nuclit, in e= ruditos oculos, ne fensum quidem cadant, nihil= que de Cæli incorruptibilitate detrahatur. Vel enim raritas, & densitas per motum localem partium fiunt, uel per aliquod sibi conueniens principium simile frigo= ris, & caloris: Certè ex his neutrum cum primis qualitatibus affinitatem habet quæ sub. perniciem creet. Hæc de reli= quis in Cælo Phoenomenis. Quid de

eo dicere fas est, quod Mathematicorum
beneficio nostra hac luce donit in lucem:
Planetæ sydérum Principes reliquorum,
